# Equitec E-Expert

**The E-Expert saddle is the flagship of the Equitec saddle line.**

The E-Expert saddle is manufactured out of the finest Italian Calf hide combined with exclusive Nordic leather used in the flaps and skirts to give an immediate broken in feel.

The E-Expert saddle is built around Equitec's newly developed saddle tree, E-futureflex, with a specially designed low head and shortened side rails to allow optimised fitting to Icelandic horses. E-futureflex is a traditional saddle tree build in beech wood laminate veneers for strength, and moulded together under a vacuum laminate press. The tree is short so the saddle has a contact area that is only 42 cm long for 17" seat. This short contact area makes the saddle fit perfectly for the short back of the Icelandic horse.

The E-Expert saddles are made with anatomically right developed hybrid panels of natural wool flock with a layer of neoprene around them. The neoprene keeps moisture away from the wool to ensure that the panels keep their shape and function for as long as possible. The panels are constructed using shock absorbing technology proven to dissipate pressure over the horses back.

The anatomic panels distribute the riders weight in the best possible way evenly over the horses back. The panels are filled in a special way to keep the horses movements around the shoulders as free as possible.

## **Specifications for the Equitec E-Expert saddle:**

- \* Newly developed extra wide anatomic saddle pads that protect the horse in the best possible way, filled with wool and covered with neoprene. The neoprene keeps moisture away from the wool to ensure that the panels keep their shape and function for as long as possible
- \* Specially developed seat and kneepads give the rider optimal support and position in the saddle. The extra wide seat and the narrow twist give a really comfortable feeling for the rider, the wide seat gives really good support to the hips and the narrow twist helps the rider to get as close to the horse as possible.
- \* Extra filling of latex in the seat and kneepads to give great soft feeling.
- \* Manufactured out of the finest Italian Calf hide in the soft latex seat and pad combined with exclusive Nordic leather used in the flaps and skirts to give an immediate broken in feel
- \* E-futureflex saddle tree laminate with special synthetic fibres.
- \* Wide gullet to ensure that the horse has freedom he needs to move in the most comfortable way.
- \* Very short contact area, only 42 cm long on a saddle with a 17" seat.
- \* Width of the pommel can be changed between 28-32"
- \* The E-Expert is available in size 16",16.5",17",17.5" and 18" (18" needs to be specially ordered).

*Finest Italian Calf hide combined with exclusive Nordic leather used in the flaps and skirts to give an immediate broken in feel.*

*Equitec's  
E-futureflex*

*Panels are constructed using shock absorbing technology proven to dissipate pressure over the horses back.*

**Price 3.350,- €**

# Equitec E-Star

Equitec E-innoflex saddle tree

*Newly developed medium deep seat gives the correct position for the rider with optimal support.*

*Equitec's 3 layer latex filling in the saddle pads gives a "air pillow" effect inside the pads for the optimal shock absorbing and distribution of weight over the horses back.*

**Price 2.400,- €**

**The E-Star saddle is handmade in great quality out of oiled high quality German calf leather, beautiful saddle that lasts for many years.**

E-Star has a medium deep seat that gives the rider perfect support and position in the saddle.

**The E-Star saddle** is built around Equitec's E-innoflex saddle tree, a saddle tree specially made for the Icelandic horse and tested for many years. E-innoflex is a polyamid flexitree with synthetic fibres and specially developed feather steel that gives the tree a strong and flexible core that shapes it self perfectly around the horses back. The tree is short so the saddle has a contact area that is only 44 cm long for a 17" seat. This short contact area is essential for the short backs of the Icelandic horse.

**The E-innoflex** tree is made with an exchange system, so you can change the width of the saddle tree around the shoulders, there are 7 different widths (24-30) so you can always find the right with for your horse.

**The E-Star** has newly developed anatomic saddle pads that are made extra wide, with round smooth edges and free space for the shoulders. The new saddle pads are developed so the pads are free of bad pressure points that many horses suffer from.

Our new saddle pads distribute the riders weight evenly over the horses back.

**Specifications for the Equitec E-Star saddle:**

- \* Newly developed extra wide and anatomically fitted saddle pads that protect the horses back in the best possible way.
- \* Equitec's 3 layer latex filling in the saddle pads gives a "air pillow" effect inside the pads for the optimal shock absorbing and distribution of weight over the horses back.
- \* Newly developed medium deep seat gives the correct position for the rider with optimal support.
- \* The kneepads are made in soft latex to ensure the comfort and perfect support for the knees.
- \* Oiled German high quality calf leather, gives a durable saddle with great look.
- \* This saddle is a single flap that gives the rider a close contact feeling.
- \* E-innoflex saddle tree with an exchange system so the rider can choose between 7 different widths so the tree fits their horse.
- \* Extra latex filling in the seat, kneepads and saddle flap for the optimal comfort for the rider.
- \* Short contact area (44 cm for 17") so the saddle is perfectly balanced over the short back of the Icelandic horse.
- \* E-Star is available in size 16",16.5",17",17.5" and 18" (18" needs to be specially ordered)

# Equitec E-Lux

**The E-Lux saddle is handmade in great quality out of oiled high quality German calf leather, beautiful saddle that lasts for many years.**

E-Lux has a medium deep seat that gives the rider perfect support and position in the saddle.

**The E-Lux saddle** is built around Equitec's E-innoflex saddle tree, a saddle tree specially made for the Icelandic horse and tested for many years. E-innoflex is a polymid flexitree with synthetic fibres and specially developed feather steel that gives the tree a strong and flexible core that shapes it self perfectly around the horses back. The tree is short so the saddle has a contact area that is only 44 cm long for a 17" seat. This short contact area is essential for the short backs of the Icelandic horse.

**The E-innoflex tree** is made with an exchange system, so you can change the width of the saddle tree around the shoulders, there are 7 different widths (24-30) so you can always find the right with for your horse.

**The E-Lux** has newly developed anatomic saddle pads that are made extra wide, with round smooth edges and free space for the shoulders. Hybrid panels of natural wool flock and latex foam. We wanted to combine the fantastic shock absorbing qualities of the wool with the close contact feeling of the latex panels in these pads.

The new saddle pads are developed so the pads are free of bad pressure points that many horses suffer from. Our new saddle pads distribute the riders weight evenly over the horses back.

## **Specifications for the Equitec E-Lux saddle:**

- \* Newly developed extra wide and anatomically fitted saddle pads that protect the horses back in the best possible way.
- \* Hybrid panels of natural wool flock and latex foam.
- \* Newly developed medium deep seat gives the correct position for the rider with optimal support.
- \* The kneepads are made in soft latex to ensure the comfort and perfect support for the knees.
- \* Oiled German high quality calf leather, gives a durable saddle with great look.
- \* This saddle is a double flap saddle.
- \* E-innoflex saddle tree with an exchange system so the rider can choose between 7 different widths so the tree fits their horse.
- \* Extra latex filling in the seat, kneepads and saddle flap for the optimal comfort for the rider.

**Price 2.000,- €**

**The E-Free saddle is handmade in great quality out of oiled high quality German calf leather, beautiful saddle that lasts for many years.**

E-Free has a deep seat and a narrow twist that gives the rider perfect support and position in the saddle, gives great support for seat bones and helps the rider get a close contact feeling with the horse.

The E-Free saddle is built around Equitec's E-innoflex saddle tree, a saddle tree specially made for the Icelandic horse and tested for many years. E-innoflex is a polymid flexitree with synthetic fibres and specially developed feather steel that gives the tree a strong and flexible core that shapes it self perfectly around the horses back. The tree is short so the saddle has a contact area that is only 44 cm long for a 17" seat. This short contact area is essential for the short backs of the Icelandic horse.

The E-innoflex tree is made with an exchange system, so you can change the width of the saddle tree around the shoulders, there are 7 different widths (24-30) so you can always find the right with for your horse.

The E-Free has newly developed anatomic saddle pads that are made extra wide, with round smooth edges and free space for the shoulders. Hybrid panels of natural wool flock and latex foam. We wanted to combine the fantastic shock absorbing qualities of the wool with the close contact feeling of the latex panels in these pads. The new saddle pads are developed so the pads are free of bad pressure points that many horses suffer from.

Our new saddle pads distribute the riders weight evenly over the horses back.

**Specifications for the Equitec E-Free saddle:**

- \* Newly developed extra wide and anatomically fitted saddle pads that protects the horses back in the best possible way.
- \* Hybrid panels of natural wool flock and latex foam.
- \* Newly developed deep seat with narrow twist gives the correct position for the rider with optimal support.
- \* The kneepads are made in soft latex to ensure the comfort and perfect support for the knees.
- \* Oiled German high quality calf leather, gives a durable saddle with great look.
- \* This saddle is a single flap saddle that gives the rider a close contact feeling.
- \* E-innoflex saddle tree with an exchange system so the rider can choose between 7 different widths so the tree fits their horse.
- \* Extra latex filling in the seat, kneepads and saddle flap for the optimal comfort for the rider.
- \* Short contact area (44 cm for 17") so the saddle is perfectly balanced over the short back of the Icelandic horse.
- \* E-Free is available in size 16",16.5",17",17.5" and 18" (18" needs to be specially ordered)
